

HCAI SYSTEM UPDATES

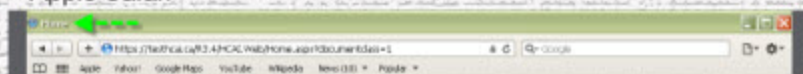

Enhanced Web Browser Support

- i) Apple's Safari browser (version 5.0.3) has now been added to the list of browsers currently supported by HCAI.
- ii) Internet Explorer 8 and Firefox 3.6.13 remain the browsers that are certified and tested for the best User experience with HCAI.

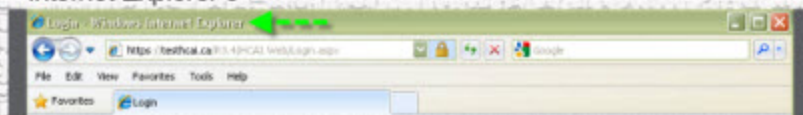

Computer Requirements and Tips

To learn more about web browsers and HCAI, go to the Computer Requirements and Tips page at HCAIinfo.

Apple Safari

Internet Explorer 8

Mozilla Firefox

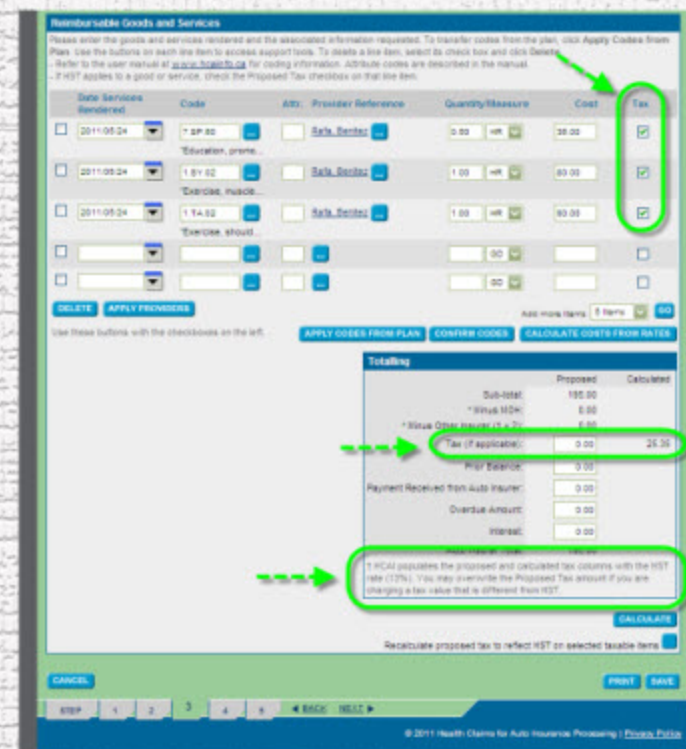

ii)

TAX FIELD NOW AUTO-POPULATES

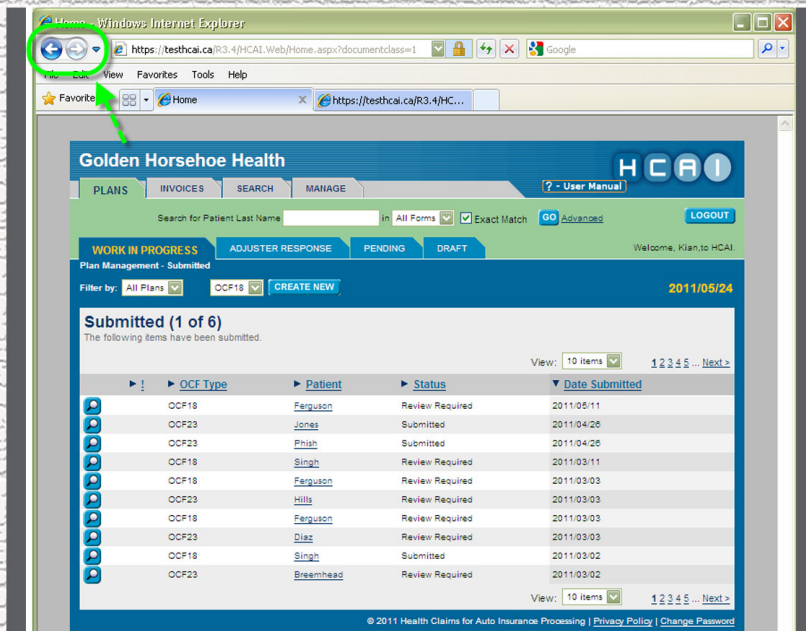

When you select the "Tax" box for any goods and services to which tax applies, then click on the **CALCULATE COSTS FROM RATES** button, HCAI will automatically populate the Tax field in the "Totalling" section.

To provide enhanced flexibility, you can insert your own tax value in the Tax field next to the figure that is auto-populated by HCAI in the Totalling section of the OCF.

NAVIGATION BUTTON ENHANCEMENTS

USER EXPERIENCE

"The Password Reset resources at HCAI info have ended my clinic's password problems. Now everyone at my clinic knows exactly how we can reset our passwords ourselves, whenever we need to."

HCAI has been enhanced to provide Users with the flexibility to use the browser navigation buttons (forward, back and page refresh). Prior to this enhancement, Users were only able to navigate HCAI's screens by using the navigation buttons found within the application. This ability to use browser navigation buttons with HCAI further boosts HCAI's usability.

To learn more about the Passwords & Password Resets,

- i. From the HCAI homepage, click on the Passwords & Password Resets text-link near the top right-hand corner of the screen
- ii. Review the information in the Resetting Passwords section
- iii. Review the Password FAQs
